- Support offered to complete Post-graduate study

The Faculty of Science has more than 9000 students and over 500 staff dedicated to advancing scientific knowledge. It delivers flexible and innovative teaching programs designed to produce job-ready graduates for a diverse range of professions.

The School of Biomedical Sciences is a well established, multi-campus, academic unit that offers undergraduate and postgraduate courses both onshore and offshore in a wide variety of courses including pre-hospital care. The School is committed to enhancing its reputation as a high performing multidisciplinary school by having academics focused on providing quality education and being actively involved in a variety of medical, biotechnology and health based research programs that complement these courses.

Located in the School of Biomedical Sciences the successful applicant will teach in the Pre hospital Care Programs which include the Bachelor of Clinical Practice (Paramedic), Graduate Diploma of Clinical Practice (Paramedic), Post Graduate Certificate in Intensive Care Paramedic Studies, and Post Graduate Certificate in Paramedic Leadership and Management programs for internal and distance students. The successful applicant will also have the opportunity to supervise higher degree students and to teach in other postgraduate programs in areas where they hold suitable academic qualifications. In addition, there will be an expectation to develop a body of research or professional activity relevant to pre hospital care.

We are a growing school looking for dedicated professionals who can complement our diverse program. The University offers support for research activities, further study and professional development. You will be joining a highly regarded team, and will enjoy the opportunity to be part of its success.

**Applicants are expected to apply online and address the selection criteria listed in the position description.**

**Applications close: Sunday, 22 April 2012**
